

AMENDMENT TO THE CLAIMS

Replace the claims with the following rewritten listing:

Claim 1 (Cancelled).

2. (Currently Amended) ~~A track as claimed in claim 1~~ A skid-steer vehicle having at least a pair of wheels on each side thereof, a track mounted on each pair of wheels and comprising a tread section of a tire, wherein the tread section is obtained by cutting side walls out of a conventional pneumatic tire.
3. (Currently Amended) ~~A track as claimed in claim 1~~ A skid-steer vehicle having at least a pair of wheels on each side thereof, a track mounted on each pair of wheels and comprising a tread section of a tire, wherein the tread section is obtained from a conventional tire mold having side wall portions of the mold blocked off.
4. (Currently Amended) ~~A track~~ skid-steer vehicle as claimed in claim 1~~2~~, wherein each of the wheels comprises a hub having a pneumatic tire thereon.
5. (Currently Amended) ~~In a~~ A skid-steer vehicle as claimed in claim 2, further including having at least a pair of wheels on each side thereof and a track mounted on the pair of wheels on each side, a guide system comprising a plurality of disks, each of the disks being mounted upright on at least one a side of a respective one of the wheels adjacent an associated edge of the track in use.
6. (Currently Amended) ~~A guide system~~ skid-steer vehicle as claimed in claim 5, wherein a ~~said~~ disk is provided at least at an inner side of each ~~said~~ respective wheel.
7. (Currently Amended) ~~A guide system~~ skid-steer vehicle as claimed in claim 5, wherein a pair of said disks are provided at opposite sides of each ~~said~~ respective wheel.

8. (Currently Amended) A ~~guide system~~ skid-steer vehicle as claimed in claim 5, wherein each ~~said~~ of the disks is connected to a hub of the respective wheel.
9. (Currently Amended) A skid-steer vehicle having a pair of wheels on each side thereof, a pair of tracks each mounted on the wheels on a respective side of the vehicle, each said track being ~~the~~ a tread section of a rubber tire which has had its side walls removed, and an upright guide disk mounted on at least one side of each of the wheels, each said disk being located adjacent an associated edge of the track on the respective side of the vehicle.
10. (Previously Presented) A vehicle as claimed in claim 9, wherein the vehicle is a ride-on mini-loader, and each said wheel comprises a metal hub having a pneumatic tire thereon.
11. (New) A skid-steer vehicle as claimed in claim 3, wherein each of the wheels comprises a hub having a pneumatic tire thereon.
12. (New) A skid-steer vehicle as claimed in claim 3, further including, a guide system comprising a plurality of disks, each of the disks being mounted upright at a side of a respective one of the wheels adjacent an associated edge of the track in use.
13. (New) A skid-steer vehicle as claimed in claim 12, wherein a disk is provided at least at an inner side of each respective wheel.
14. (New) A skid-steer vehicle as claimed in claim 12, wherein a pair of said disks are provided at opposite sides of each respective wheel.
15. (New) A skid-steer vehicle as claimed in claim 12, wherein each of the disks is connected to a hub of the respective wheel.
